

Effective Sleep Apnea Therapy Without the Machine

Bongo Rx is a **clinically tested** device for treating mild to moderate Obstructive Sleep Apnea

- ✓ Small & simple with **no machine** or power required
- ✓ Uses your own exhalation to generate EPAP (Expiratory Positive Airway Pressure) to keep the airway open.
- ✓ Use at home, traveling, camping... **use anytime, anywhere**
- ✓ CPAP alternative that is clinically tested, FDA-cleared, and has a history of use
- ✓ Starter Kit has four sizes for **easy, contactless setup**
- ✓ Replenishment Packs available for easy resupply
- ✓ Proudly Designed and **Made in the USA**

Q1. What types of patients may benefit from Bongo Rx?

Patients with mild to moderate OSA, for example those who are:

- Newly diagnosed without significant co-morbidities
- Non-compliant with CPAP and looking for a user-friendly alternative
- Patients that travel or patients that need a device any time electricity may not be available
- Cannot get a CPAP or afford CPAP because of high deductibles or high co-payments

Q2. How does Bongo Rx work?

Bongo Rx has soft nasal seals that dilate the nasal passages. During inhalation, small valves open to allow you to breathe normally through the device. During exhalation, the valves close to direct the exhaled air through precisely designed vent holes to generate **EPAP (Expiratory Positive Airway Pressure)**, which keeps the airway open until you inhale again.

Frequently
Asked
Questions

The New Rhythm in Sleep

Q3. Has the Bongo Rx been clinically tested?

Yes, clinical testing was conducted to demonstrate the safety and effectiveness of the Bongo Rx and testing was reviewed by the FDA. Results demonstrated that the Apnea-Hypopnea Index (AHI) was significantly reduced while using the Bongo Rx compared to the patients' baseline diagnostic. There were no serious adverse events.

Q4. What are the key patient benefits of Bongo Rx?

- CPAP alternative provides freedom from machines, hoses, and power
- Small size so discreet and convenient
- Use at home and while traveling
- Quick startup
- Simple to use
- No assembly required
- Easy to clean

Q5. Does the Bongo Rx need a prescription?

Yes, as all devices that treat sleep apnea require a prescription in the U.S. Please consult with the clinician.

Q6. How do I determine the correct size for the Bongo Rx?

All patients should start with Part Number **BNG500** (Bongo Rx Four Sizes Starter Kit). This part includes one each of 4 different sizes (SM, MD, LG, and XL) and allows the patient to take their time at home finding the size that fits them best. This kit also includes a travel case, a drying stand, and a headgear.

Q7. What should a patient order when they need to replace their Bongo Rx?

Once a patient knows their preferred size and they have been using their original Starter Kit for up to 90 days, they should then order one of the Annual Replenishment Packs, which include four Bongo Rx devices of a specific single size (either XS, SM, MD, LG, or XL). Annual Replenishment Packs also include a new headgear.

Q8. Is Bongo Rx covered or reimbursed under insurance plans?

Bongo Rx, like many CPAP alternative devices, is not a covered item under medical insurance plans. Patients may be able to utilize their FSA/HSA healthcare savings plans for the Bongo Rx since it is a prescription device.
